

FLECK 5800 CONTROL VALVES

HIGH PERFORMANCE FLEXIBLE VALVE

FEATURES/BENEFITS

Fiber-reinforced polymer valve body for superior strength and durability, non-corrosive, and UV-resistant

Continuous service flow rate of 21 GPM with a backwash of 17 GPM

Backwash capability accommodates softener tanks up to 16" and filter up to 16" in diameter

Fully adjustable 3- or 5-cycle control for efficient and reliable water treatment system

Time-tested, hydraulically-balanced piston for service and regeneration

Optical sensor for precision cycle positioning

Soft water refill for a cleaner brine tank

Designed with double backwash for reduced hardness leakage

Diagnostics for historical valve performance

Programming stored in memory and will not be lost due to power outages

OPTIONS

Filter or softener control valves

Downflow co-current or upflow counter-current regeneration

Plumbing connections in 3/4" to 1-1/4" NPT, BSP, and sweat

Fiber-reinforced polymer or stainless steel bypass valve

Variable reserve for increased efficiency

Programmable regeneration types for increased flexibility

Three color bezel options of black, silver, or blue

XTR2- Premium touch screen LCD display with two programmable relay outputs for both normally opened and normally closed contacts

SXT-Large LCD display with one programmable relay output for both normally open and normally closed contacts

LXT– Midsize LCD display comes preprogrammed for your choices of softener or filter and time clock or metered, with a maximum of 5 parameters to complete set-up

TESTED and CERTIFIED by the WQA to NSF/ANSI Standard 372 for Lead Free Compliance.

TESTED and CERTIFIED by the

WQA to NSF/ANSI Standard 44

for Water Softener Performance.

UL recognized to the 979

TESTED EMC and Low Voltage Directive

Restriction of Hazardous Substance Compliant
